drop technology The clutter-free picture manager from PureApp Publishing. Well, its been a long time since the last time I have posted. Why? Actually, as you guys know, I have been busy with our project: Magic Tree. After an intense period of planning and working I find myself finally writing the design outline and fully equipped to start making the concept reality. Introduction

MagicTree is a free application, available for PC, Mac and tablets.

All it does is use the phone's camera as a light source to cast Shadows on a Surface and make patterns from them. What I am trying to do with MagicTree is to give an instant exposure to the viewer. In one fell swoop you can carry on a 3D conversation with those around you. MagicTree does not require any additional software for you to use. The only thing you need is a flat Surface, a SurfaceView and MagicTree.

Updates: It took Apple a while
but they really updated iPhoto
(iPhoto '09). It is a new feature-
packed upgrade with some great
features and improvements. It is
by far the best and most complete
photo organizing software on the
Mac. Although it is \$79.99 new,

you can get your hands on the update quite easily as Apple offers a free upgrade for those who purchased a previous version of iPhoto. iPhoto '09 is available for new purchases and for those who already purchased the software you will get the update automatically. You can download iPhoto from the Mac App Store. If you already bought a previous version of iPhoto you should have received an email with instructions. iPhoto '09 features: -

A totally redesigned interface. Although the interface is very different (closer to Photoshop) it is a lot cleaner and more intuitive. You can easily explore your photo library from the main window. - Importing or exporting of multiple photos at once. - Tagging your photos: Create as many tags as you want (or take advantage of the auto-tagging feature). - New Camera Roll: Not only is the list easier to explore but also the new Camera Roll is much more

intuitive. - **New Faces:** Select your best face, their age range and modify their appearance. - **New Events:** Import your photos from events or make new events. - **Photos & Events:** With the new Events tab you can keep track of your photos which are connected to events. This is great if you like to keep your memories in one place. - **Migration Assistant:** The iPhoto '09 Migration Assistant is easy to use and allows you to migrate your photos and events

from any other program. This includes actions such as tagging or sorting photos. - Print Service:
