Keymacro is an alternative to Ctrl+Alt+Del for the Macintosh. Whether you are using a standard keyboard or an infrared one, Keymacro allows you to do most of what you can on the Windows command line by pressing only one key. Keymacro can also be used in conjunction with TextExpander and CopyTrans to create more efficient text files. Keymacro is also a safe script interpreter. We have removed all of the security holes and now it has been enhanced to the point where we are confident it will never do anything malicious. TextExpander Description: TextExpander is a powerful tool for making keystrokes more efficient and less prone to typing errors. It works by replacing text on your Mac with text macros that are triggered by special keys. You can also record a new macro, share your macros with others, and even subscribe to feeds that send you text macros. TextExpander also has a lot of keyboard shortcuts. Here are some of our favorites. TextExpander Blog Description: TextExpander is a simple application that is very powerful. It's useful for creating text macros that you can share with others or with a Mac. When you use TextExpander with CopyTrans and Keymacro, you can get text macros that generate

Hi! I have run into a problem with the latest version. Every time I run it it gets to step 2 in the install process, and then it freezes. (it never gives me the option to keep or cancel). Does anyone know what's up? It worked fine in the last version. Thanks Guys i can't download anything! it's just showing a blank page for all torrents that I try to download with my browser and downloader. I'm using a 64bit firefox if that matters.

Comments Hi y'all! I can't seem to download anything via your software. When I go to the site and try to download anything, it freezes up on the second step of the install process. Sometimes it installs and then tells me that I can't download the file, even though it is actually in my downloads directory. Sometimes I get an error that says there was a problem with the website and I have to try later. I've tried just about everything I can think of. Thanks!

Q: jquery resize and scroll I have the following code:

```
$('#thelist').ready(function() { var scrollHeight = $(window).height() - 150; var liHeight = $("ul").height() - 150; $('#thelist').height(scrollHeight); $(window).resize(function(){ $('#thelist').height(liHeight); }); });
```

but it doesn't work. The #thelist is a div containing a ul list, all of which are styled to be the same.

A: try `$(window).resize(function(){ $('#thelist').height($("ul").height() - 150); });`
